

Swan Pond

Some enquiries have been received recently about when the pond is going to be tidied-up. The answer to this is "As soon as possible!" However, in observing good practice adopted by the vast majority of councils throughout the country, this will not be done until after the "nesting season" finishes in September. This includes a restriction on being able to get into the pond to clear up debris.

We have also suffered from some mindless vandalism which has destroyed 2 teak benches and damaged the third. Replacement benches have been ordered and these will be also be installed as soon as possible.
